### HARD DRIVE PUNCH

The ideal solution for making discarded hard drives from personal computers, notebooks, printers and copiers unusable. At the touch of a button, the EBA 0101 HDP punches a hole completely through the hard drive, rendering the stored data unaccessible. Suitable for 2½” or 3” drives.

**Security Levels**

#### SECURITY LEVELS ACCORDING TO DIN 32 757

International standards define five levels of security, which determine the maximum width for strip cut as well as the maximum particle size. When shredding large quantities of paper, for example with a high-capacity shredder, a higher security level can be achieved by additional measures like mixing or compacting the shreds.

**SECURITY LEVELS**

- **LEVEL 1:** strip size ≤ 7 mm, for general documents, to be made illegible.
- **LEVEL 2:** strip size ≤ 7 mm, for secret documents, to be made illegible.
- **LEVEL 3:** strip size ≤ 0.8 mm, for confidential documents, to be made unreadable.
- **LEVEL 4:** strip size ≤ 0.8 mm, for secret documents, to be made unreadable.
- **LEVEL 5:** strip size ≤ 0.8 mm, for secret documents, to be made unreadable.
